Technologically advanced enough to include all mission critical features necessary to provide the most advanced treatment for Sudden Cardiac Arrest. Yet so simple and unintimidating to use that even non-medical personnel can effectively save lives.

For first response professionals like police, fire and EMS, the Lifeline AED (Automated External Defibrillator) is standard equipment. For schools, offices, stores, malls, factories, and public places, it's becoming as vital as the fire extinguisher.
Defibtech’s breakthrough design makes it possible for every budget to afford a life-saving AED

**Brilliant Design**
With its bright yellow and black coloring and attractive, sleek curves, the non-intimidating Lifeline AED invites prominent display anywhere.

**Latest Technology**
The biphasic defibrillation we use is extremely effective at resuscitating patients in ventricular fibrillation—the most common form of Sudden Cardiac Arrest—on the first shock.

**Easy to Use**
The Lifeline AED is designed for speed and simplicity. Built to the demanding standards of professional emergency personnel. Simple enough for non-medical users.

**Lightweight, Durable**
At just 4.2 pounds a child could carry it. Plus, the Lifeline AED is tested to US Military “drop and shock” specifications.

**Handle This**
Roomy, sure-grip rubberized handle makes it simple to pull off the wall and carry quickly to the patient.

**Text, Lights and Voice Guides**
A calm voice guides the responder step by step while a text display with lights shows the progress.

**Pads at the Ready**
The electrode pads are tucked into a back pocket ready to apply.

**Big Buttons**
The “Power On” and “Shock” buttons are oversized and brightly lit so even the most nervous fingers will hit their mark.
